SHAPING THE FUTURE OF AQUACULTURE THROUGH INVESTMENT

The world's population continues to grow

10 BILLION

1900

1925

1950

1975

2000

2025

2050

A large school of silver fish, possibly sardines or anchovies, swimming in clear blue water. The fish are densely packed in the center and spread out towards the edges, creating a sense of movement and abundance. The lighting is bright, highlighting the silvery scales of the fish.

Good aquaculture is
essential for the future.

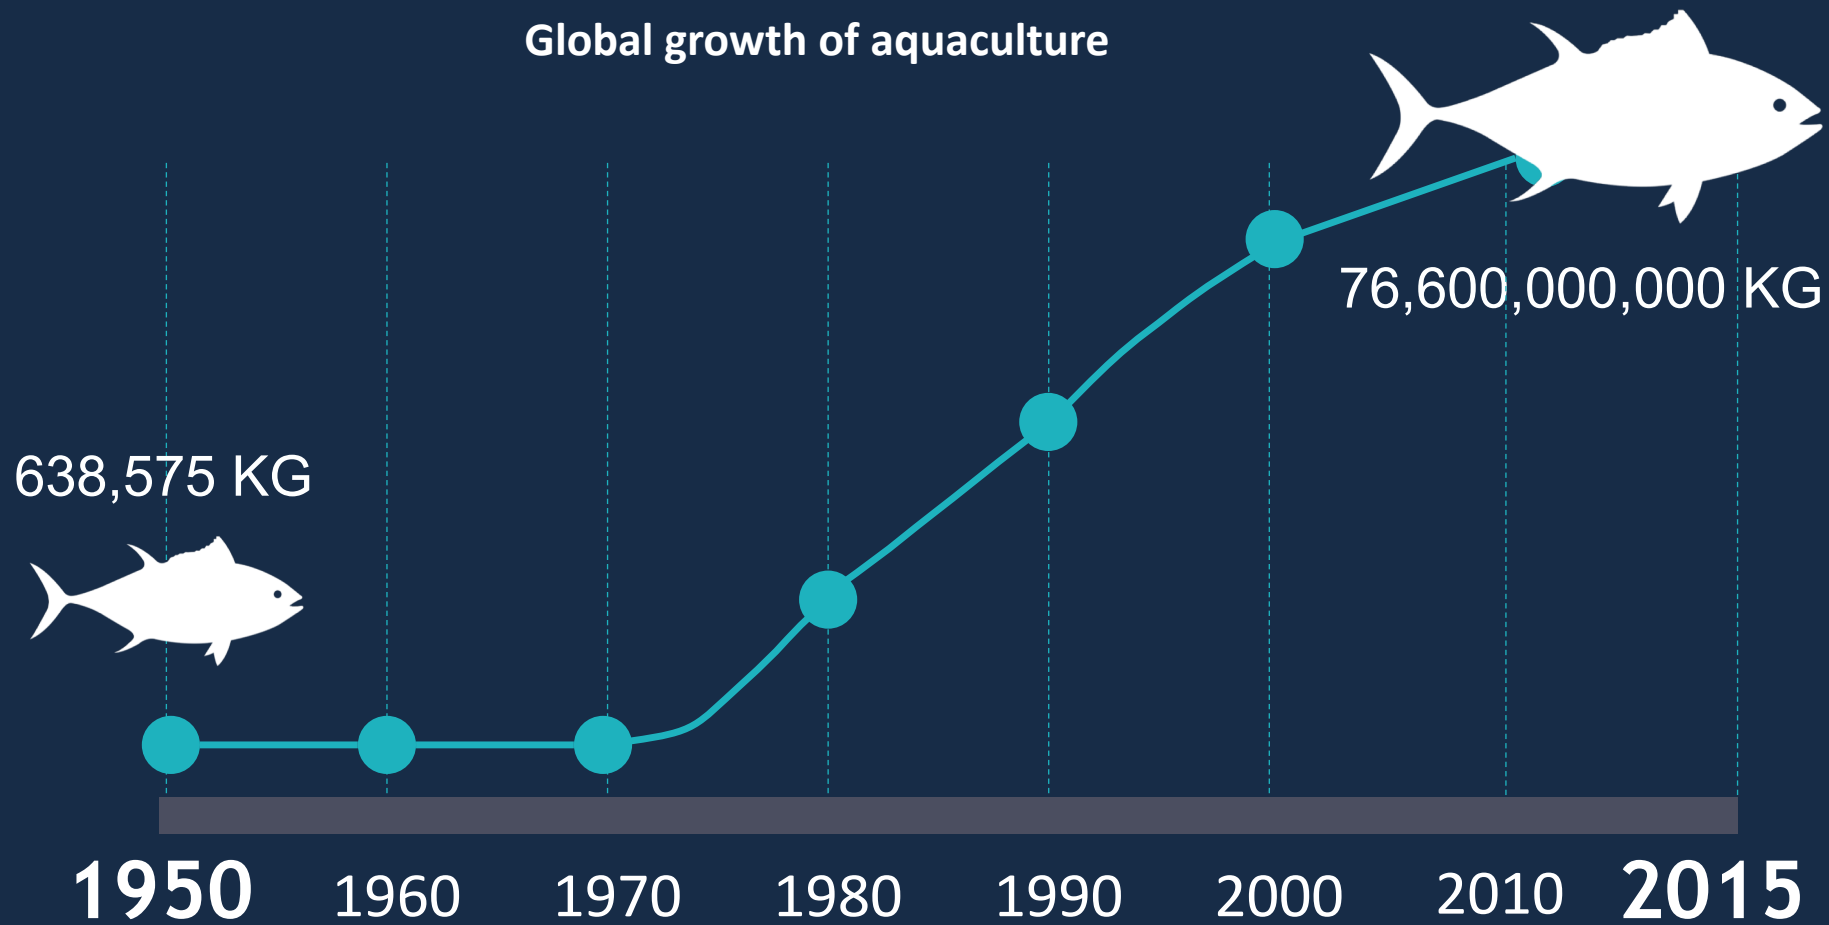

xpertSea

Global growth of aquaculture

Aqua-Spark strives to move the
aquaculture industry towards
healthy, sustainable, affordable
production with comparable
financial returns

STRATEG
Y

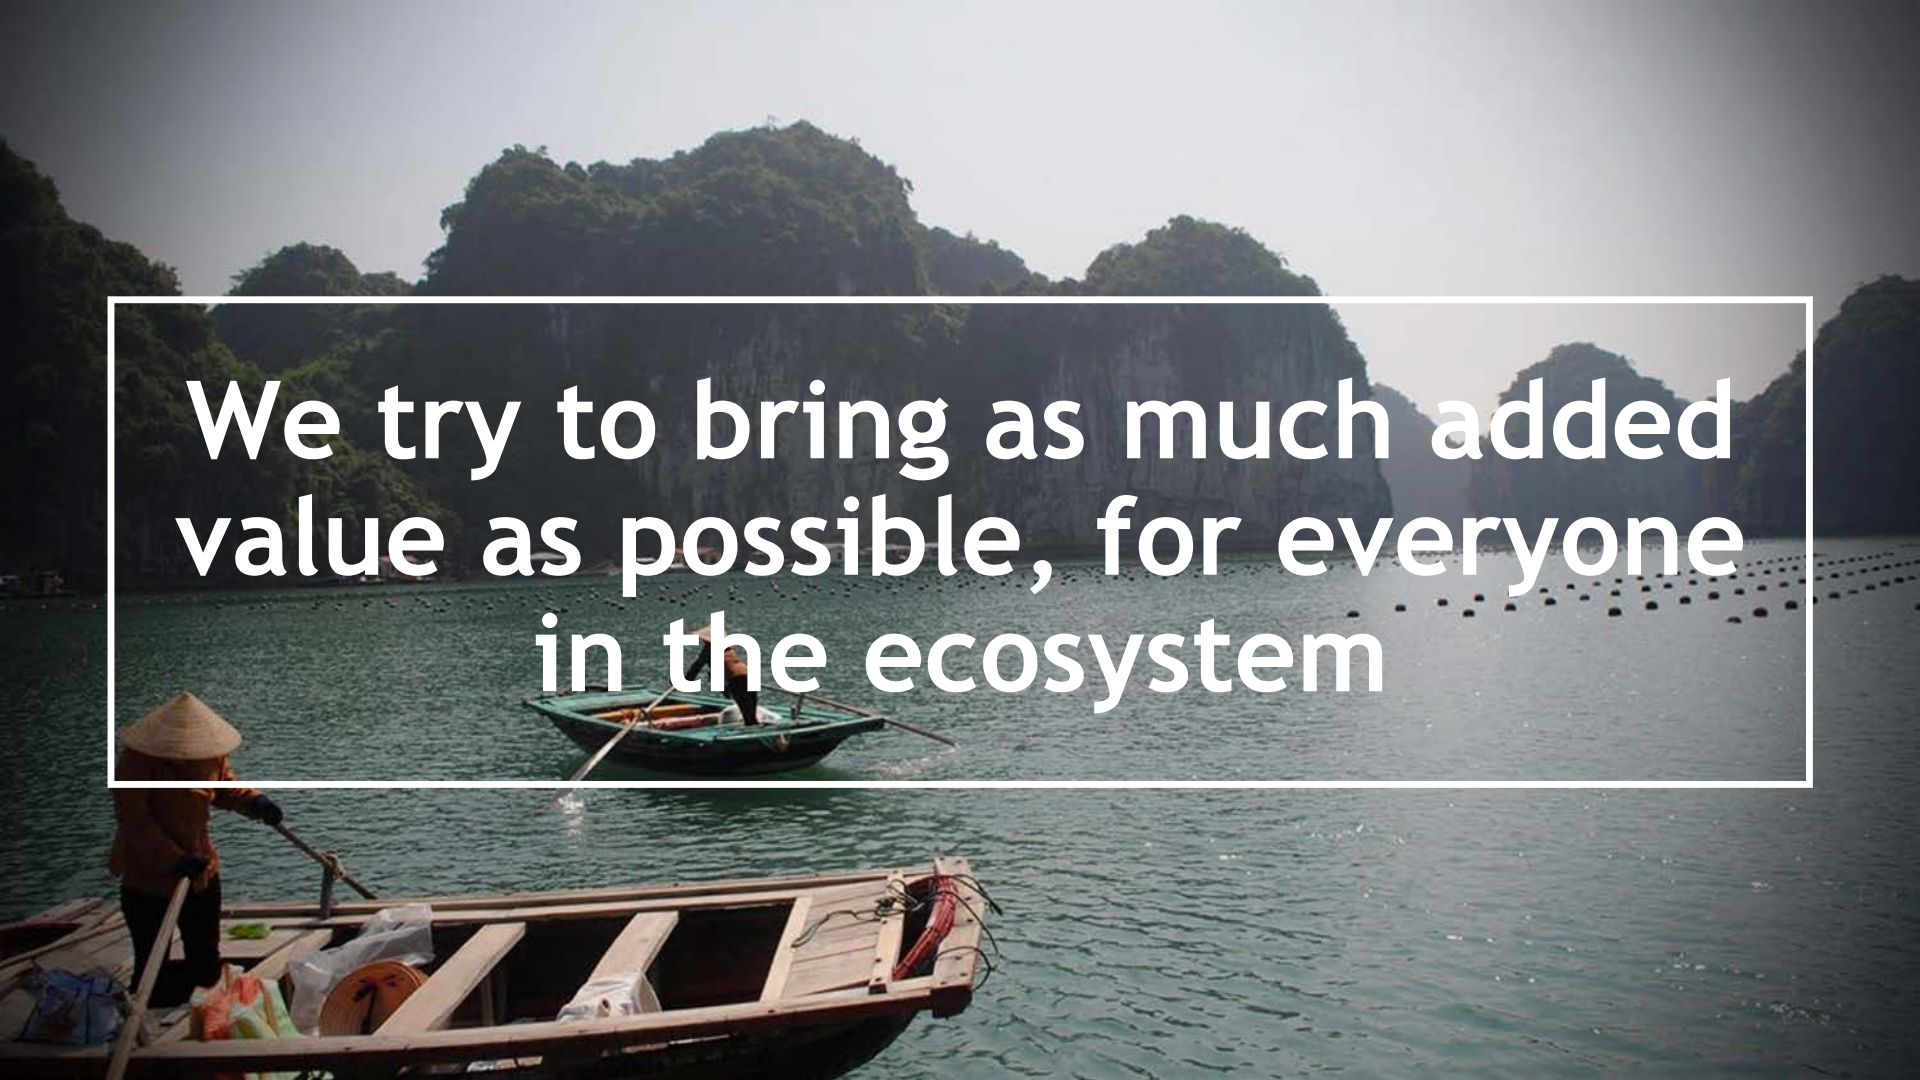

building an **ecosystem**
across the value chain
60 - 80 COMPANIES

ACROSS SPECIES

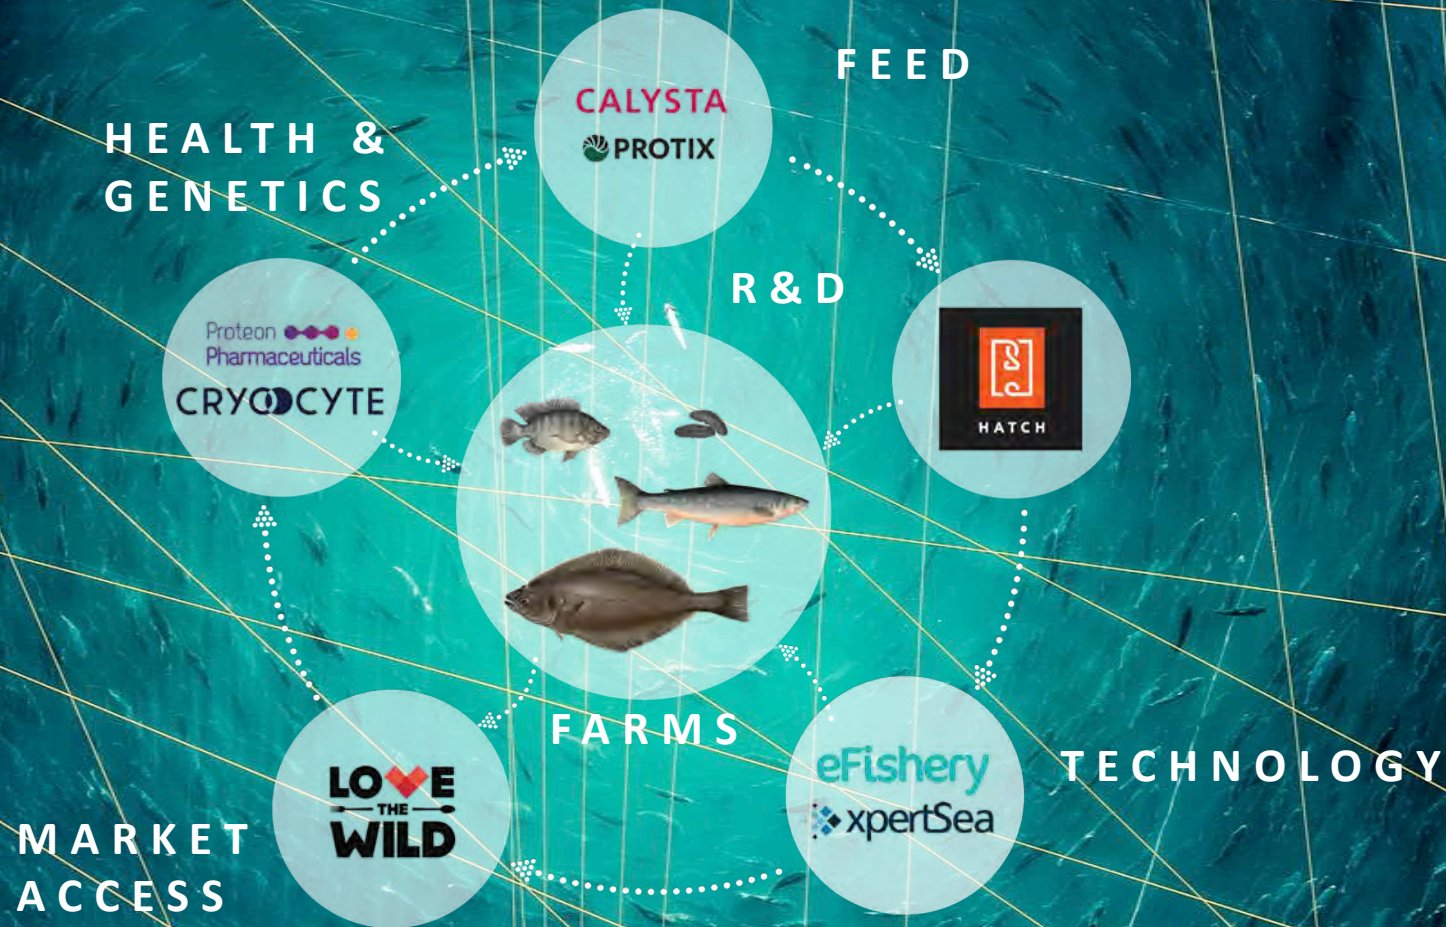

ACROSS GEOGRAPHIES

A scenic view of a body of water, likely a bay or lake, with two small boats in the foreground. The boat in the lower left is a wooden boat with a person wearing a traditional conical hat. The boat in the middle is a green boat with a person inside. The background features large, steep limestone karsts covered in green vegetation. The water is calm with some ripples. A white rectangular box with a thin border is overlaid on the image, containing the text.

We try to bring as much added
value as possible, for everyone
in the ecosystem

Global aquaculture production
needs **to triple by 2050**

**Join the blue revolution and the
future of food production!**
